

WAGNER Rail GmbH**Individual fire protection solutions from a single source**

WAGNER Rail is more than 20 years successfully active in the field of fire protection solutions for trains. With its unique portfolio of approved products and system solutions WAGNER has become the worldwide leading provider of fire protection solutions for railway vehicles.

WAGNER Group – a family owned company - has approx. 700 employees, of which around 35 work for WAGNER Rail. The WAGNER Group's turnover amounts 123 mEUR, of which 10 to 15% is generated by WAGNER Rail.

The portfolio comprises smoke detection systems, water mist fire fighting as well as gaseous or aerosol extinguishing systems.

Our system technology can either be implemented as a stand-alone system (with direct connection to the TCMS) or as an integrative system (along with a fire alarm control unit and software interface to the TCMS). The stand-alone solution fits perfectly for retrofit matters. The fire protection solution can easily be integrated into the existing system.

The first-class smoke detection system which is very fast, reliable and false-alarm-safe, as well as the innovative low pressure water mist technology are already installed in numerous prestige objects, including among others: SBB Lok Re460, Metro Newcastle, Metro Kuala Lumpur, Metro Shenyang, KISS SBB, Flirt SBB, Stadtbahn Dortmund, ICE4 Deutsche Bahn, Thameslink, Transrapid Shanghai, Metro Munich, ÖBB Railjet, Velaro D and Eurostar, Flirt East Anglia UK, Metro Glasgow, Indian Railways, Caltrain USA etc.

Our key competencies include: production, planning, commissioning, maintenance, Retrofit, Service and much more.

WAGNER Rail complies with all relevant standards and has all approvals such as TUV South, Rail System Approval and specific approvals for various countries.

Thanks to the global network of subsidiaries and local partners worldwide, WAGNER is always close to its customers.
