

# A German research-based planning consultancy focused on the rescue sector

## Profile

- **FORPLAN** is the leading research and planning company for rescue systems located in Bonn, Germany.
- With over **1000 successfully completed projects** and proven methodological tools to determine requirements, we are the best choice for your planning needs.
- Our **interdisciplinary team** of 16 experts are engineers, geographers, health scientists, economists, and statisticians.
- Advising **municipalities, communities and private sector clients** with a focus on planning and implementation.
- Extensive experience, founded in 1986

## Key services

### Emergency Medical Services

- We analyze operational data, conduct investigations, and implement optimizations to identify the best locations. We assess the necessary rescue equipment and calculate the required personnel to improve the performance of emergency medical services for cities with up to 4 million inhabitants.

### Fire Protection Plans

- We create fire protection plans for fire departments in various cities and different companies. We examine the required needs in terms of structure, stations, personnel, equipment, and vehicles to ensure effective management.

### Disaster Protection Planning

- Our disaster protection planning services are tailored to different damage scenarios, ensuring you have the necessary structures, crisis communication channels, and resilience strategies in place.
- Expert advice on personnel requirements and technical equipment for dispatching centers.

## Approach

**Process analyses for rescue systems**

**Location Analyses**

**Risk and Hazard Analyses**

**Extensive European expert network and research partners**

**Economic feasibility reports and process analyses for rescue systems.**

## Contact

**Manfred Unterkofler, CEO**
