#### Company profile

JOCKEL has developed into a leading supplier of fire extinguishers since its foundation by Emil Jockel in 1949. Under Klaus-Gerhard Jockel, who took over the management in 1977, we diversified our offer as early as 1960 by starting a customer service and started our own production in 1983 after acquiring Taunus. Our expansion as a dealer in 1986 and the international approvals a year later underline our global commitment.

With the patenting of the permanent pressure pushbutton valve in 1991, we set standards in terms of innovation. In 2005, the transformation into a company under the leadership of Frank and Holger Jockel ushered in a new era. Today, with Sebastian, Tristan and Vanessa Jockel, the fourth generation is ready to continue our legacy with passion and vision in Remscheid and beyond.

Our family business looks back not only on a rich history, but also on a future full of possibilities.

#### Products & Services

Our range of fire protection solutions sets standards in safety and efficiency. We offer a comprehensive range of portable and mobile fire extinguishers, in both standard and special designs, to meet a wide range of needs. Our range is supplemented by high-quality smoke detectors, innovative extinguishing systems, extinguishing containers and pressure booster systems, which ensure maximum safety in every situation.

Our range of accessories, including wall hydrants and first aid kits, guarantees comprehensive cover for emergencies.

In addition, we are expanding our commitment to safety through the JOCKEL Fire Protection Academy, which provides expertise and practical skills. With specialised areas such as Professional, Automotive, Railway, Air and Home, we specifically address the needs of our customers and offer customised solutions.

#### References and export activities

The JOCKEL Group already acts among others for:  
Siemens, Mercedes Benz, Alstom, BMW, John Deere, Opel, Ford, Deutz, Salzgitter Mannesmann, Securitas, Bundeswehr, Shell, Bosch, US Army, Deutsche Bahn, Strabag; Claas, Stadler Rail, Porsche, Thyssenkrupp, Vaillant, mainly in the DACH, Benelux and NORDIC regions.

## Target group

Our main target groups are all branches with their own or affiliated plant fire brigade. They can be manufacturing industries, airports, cities, but also mining industries as well as refineries. In addition, our customers include hospital companies, technical building services, wholesale and discount markets, shipping companies as well as operators of building complexes and the hospitality industry.

## Competitive advantages

JOCKEL fire protection systems are characterised by application-oriented and convenient operation. The product range is constantly expanding, innovative fire protection solutions are launched on the market and the company is growing into an internationally successful company. JOCKEL focuses on sustainability and energy-conscious production in production.

## Ideal Business Partners

Fire brigades, facility management, fire protection companies, operators of airports, hospitals, hospitality sector, amusement parks, shopping and wholesale markets, filling station chains as well as cruises. Customers for special solutions in the automotive, rail transport and air handling sectors.
