

L&S Luddeneit und Scherf GmbH

Rail Maintenance Technologies

Headquarters: Neustadt an der Orla / Germany
Established: 1998
Employees: 55

Our key competencies

L&S Luddeneit und Scherf GmbH is a German company specialising in the development, design and manufacture of special machines for track maintenance and in the provision of rail maintenance services, in particular grinding services.

We refer to more than 25 years of extensive experience and a high level of expertise in this field. Numerous international railway, metro and tramway companies as well as harbour and crane system operators are among our customers.

We work in accordance with European guidelines and standards.

Our service portfolio and key features of our technologies

Our service machinery includes rail-road technology as well as rail-bound equipment, with which long and short track sections, turnouts, level crossings and rail extensions on almost all areas of track and in tunnels can be processed. Specially adapted technology and expertise is available for the processing of crane system rails both indoors and outdoors.

We also offer measuring services for track geometry with specially developed measuring technology. Furthermore corresponding transport, unloading and rail-in/rail-out systems are part of our portfolio.
